FITTING AN EXTRA OUTLET TO YOUR NEW OR EXISTING TANK WITHOUT ENTERING THE TANK. SIMPLY LOWER THE WATER LEVEL AS REQUIRED AND DRILL THE CORRECT SIZE HOLE FOR YOUR OUTLET. REMOVE THE STRAINER/SCREWED LID AND WITH A LENGTH OF SMALL DIAMETER CONDUIT OR SIMILAR, DIRECT INTO THE TANK, TO AND THROUGH THE OUTLET HOLE, REMOVE THE BACKNUT FROM THE NEW OUTLET AND SLIDE OVER THE CONDUIT DOWN TO THE HOLE. THEN FIT THE OUTLET THROUGH THE HOLE, FIT BACKNUT AND TIGHTEN, REMOVE CONDUIT AND FIT VALVE.

Been 'round for years
